<b>Foreword</b> .....	x
<b>Preface</b> .....	xi
<b>1 Facial Assessment</b> .....	1
Introduction .....	2
Cephalometry .....	2
Proportions.....	2
Golden Ratio.....	2
Male and Female Face Formats.....	3
Facial Biotypes.....	3
Mandibular Profile.....	3
Conclusion.....	3
References.....	3
<b>2 Anatomy of the Face</b> .....	15
Fat Pads .....	16
Periorbital Fat Pads.....	16
Superficial Fat Pads .....	16
Deep Fat Pads.....	16
Fat Pads of the Middle Third of the Face .....	17
Temporolateral Fat Pad.....	16
Jowl Fat .....	16
Fat Pad of the Lips.....	16
Buccal Fat Pad (Bichat's Fat Pad).....	17
Vascularization .....	17
Sensory and Motor Innervation .....	18
Trigeminal Nerve .....	18
Facial Nerve .....	18
References.....	18
<b>3 Biophysical Properties of Hyaluronic Acid</b> .....	95
Introduction .....	96
Physical and Chemical Characteristics.....	96
Molecular Weight and Concentration.....	96
Crosslinking.....	96
Viscoelasticity.....	96
Swelling .....	97
Particle Size and Extrusion Force .....	97
Types of Filler .....	97
Choice of Product .....	97
Biological Effect.....	97
Conclusion .....	97
References.....	97
<b>4 Anatomy of the Aging Process</b> .....	101
Introduction .....	102
Bone Alterations—Remodeling of the Cranial Skeleton.....	102
Periorbital Region.....	102
Middle Third of the Face .....	102
Piriform Aperture .....	102
Lower Third of the Face .....	103
Fat Pads.....	103
Muscles .....	103
“Concertina” Effect .....	103
Conclusion.....	103
References.....	103

<b>5</b>	<b>Anesthetic Block</b>	113
	Introduction .....	114
	Anatomical Structure of the Facial Foramens.....	114
	Supraorbital Nerve.....	114
	Supratrochlear Nerve .....	114
<b>6</b>	<b>Filler Injection of the Temporal Region</b>	135
	Introduction .....	136
	Anatomy.....	136
	Technique.....	136
<b>7</b>	<b>Filler Injection of the Eyebrows</b>	171
	Introduction .....	172
	Techniques .....	172
	Superficial Technique Using a Needle .....	172
	Deep Technique Using a Needle.....	172
<b>8</b>	<b>Filler Injection of the Forehead</b>	199
	Introduction .....	200
	Anatomy.....	200
	Technique.....	200
	Technique with Cannula Superficial to the Muscular Layer .....	200
	Technique with Cannula Deep to the Muscular Layer.....	200
<b>9</b>	<b>Filler Injection of the Glabella</b>	229
	Introduction .....	230
	Anatomy.....	230
	Intradermal Technique.....	230
<b>10</b>	<b>Filler Injection of the Malar and Zygomatic Regions</b>	249
	Introduction .....	250
	Anatomy.....	250
	Fat Pads.....	250
	Vascularization .....	250
	Innervation .....	250
	Sensory .....	250
	Motor.....	250
	Malar Fold .....	250
	Technique.....	251
	Infraorbital Nerve .....	114
	Mental Nerve .....	114
	References.....	114
	Superficial Technique .....	136
	Deep Technique.....	137
	Complications.....	137
	References.....	137
	Cannula Technique.....	172
	Region Below the Eyebrow .....	172
	References.....	172
	Technique with Supraperiosteal Needle .....	200
	Technique with Intradermal Needle .....	200
	Clinical Cases .....	200
	Complications .....	200
	References.....	200
	Supraperiosteal Technique .....	230
	Complications .....	230
	References.....	230
	Superficial Cannula Technique for the Malar Region .....	251
	Superficial Needle Technique for the Malar Region .....	251
	Deep Needle Technique for the Malar Region...	251
	Deep Cannula Technique for the Malar Region...	251
	Needle Technique for the Cheekbone Area...	251
	Cannula Technique for the Cheekbone Area....	251
	Complications .....	251
	Conclusion.....	251
	References.....	251

<b>11</b>	<b>Filler Injection of the Nasojugal Groove and Palpebromalar Groove .....</b>	291
	<b>Introduction .....</b>	292
	<b>Anatomy .....</b>	292
	<b>Vascularization .....</b>	292
	<b>Technique.....</b>	292
	Nasojugal Groove .....	293
	Palpebromalar Groove .....	293
<b>12</b>	<b>Filler Injection of the Nasolabial Fold .....</b>	321
	<b>Introduction .....</b>	322
	<b>Anatomy.....</b>	322
	<b>Technique.....</b>	322
	Technique with Intradermal Needle .....	322
	Technique with Supraperiosteal Needle .....	322
	Technique with Subcutaneous Cannula.....	322
<b>13</b>	<b>Filler Injection of the Submalar Triangle.....</b>	345
	<b>Introduction .....</b>	346
	<b>Anatomy.....</b>	346
	<b>Technique .....</b>	346
	Submalar Technique with Cannula in the Deep Plane.....	346
	<b>Clinical Cases.....</b>	346
	<b>Complications .....</b>	346
	<b>References.....</b>	346
<b>14</b>	<b>Filler Injection of the Nose .....</b>	365
	<b>Introduction .....</b>	366
	<b>Anatomy .....</b>	366
	Structure .....	366
	Vascularization.....	366
	<b>Innervation .....</b>	366
	<b>Topography.....</b>	366
	<b>Angles.....</b>	366
	<b>Ethnic Variations .....</b>	367
	<b>Aging .....</b>	367
	<b>Technique.....</b>	367
	Nasofrontal Angle and Nasal Dorsum .....	367
	Proximal Cartilage.....	367
	Distal Cartilage.....	367
	Nasolabial Angle, Columella, and Tip of the Nose .....	367
	Paranasal Sinus .....	367
	<b>Clinical Cases.....</b>	367
	<b>Complications .....</b>	367
	<b>Conclusion.....</b>	367
	<b>References.....</b>	368
<b>15</b>	<b>Filler Injection of the Preauricular Region and the Earlobe.....</b>	399
	<b>Introduction .....</b>	400
	<b>Anatomy .....</b>	400
	<b>Technique.....</b>	400
	Preauricular Technique with Cannula.....	400
	Preauricular Technique with Needle .....	400
	<b>Technique for the Earlobe with Needle .....</b>	400
	Technique for the Earlobe with Cannula.....	400
	<b>References.....</b>	400

<b>16</b>	<b>Filler Injection of the Lips, Oral Commissure, and Mentolabial Sulcus .....</b>	415	
Lips .....	416	<b>Oral Commissure and Mentolabial Sulcus ....</b> 417	
Introduction .....	416	Introduction .....	417
Anatomy .....	416	Technique .....	417
Application Technique .....	416	<b>References.....</b>	417
Complications.....	416		
<b>17</b>	<b>Filler Injection of the Chin and Mandible Contour.....</b>	459	
<b>Introduction .....</b>	460	Redefining the Mandibular Line .....	461
<b>Anatomy .....</b>	460	Lateral Mental Region .....	461

# Videos

**Video 1:** Forehead—Cannula injection technique

**Video 2:** Temple—Needle injection technique

**Video 3:** Temple, forehead, and supraperiorbital region—Cannula injection technique

**Video 4:** Malar and zygoma—Cannula injection technique (Right side)

**Video 5:** Malar and zygoma—Cannula injection technique (Left side)

**Video 6:** Nasojugal fold, Class 1—Cannula injection technique

**Video 7:** Nasojugal fold, Class 2—Cannula injection technique

**Video 8:** Palpebromalar groove—Cannula injection technique

**Video 9:** Nasolabial fold—Cannula injection technique (Right side)

**Video 10:** Nasolabial fold—Cannula injection technique (Left side)

**Video 11:** Nasolabial fold—Needle injection technique

**Video 12:** Mentolabial sulcus—Cannula injection technique (Right side)

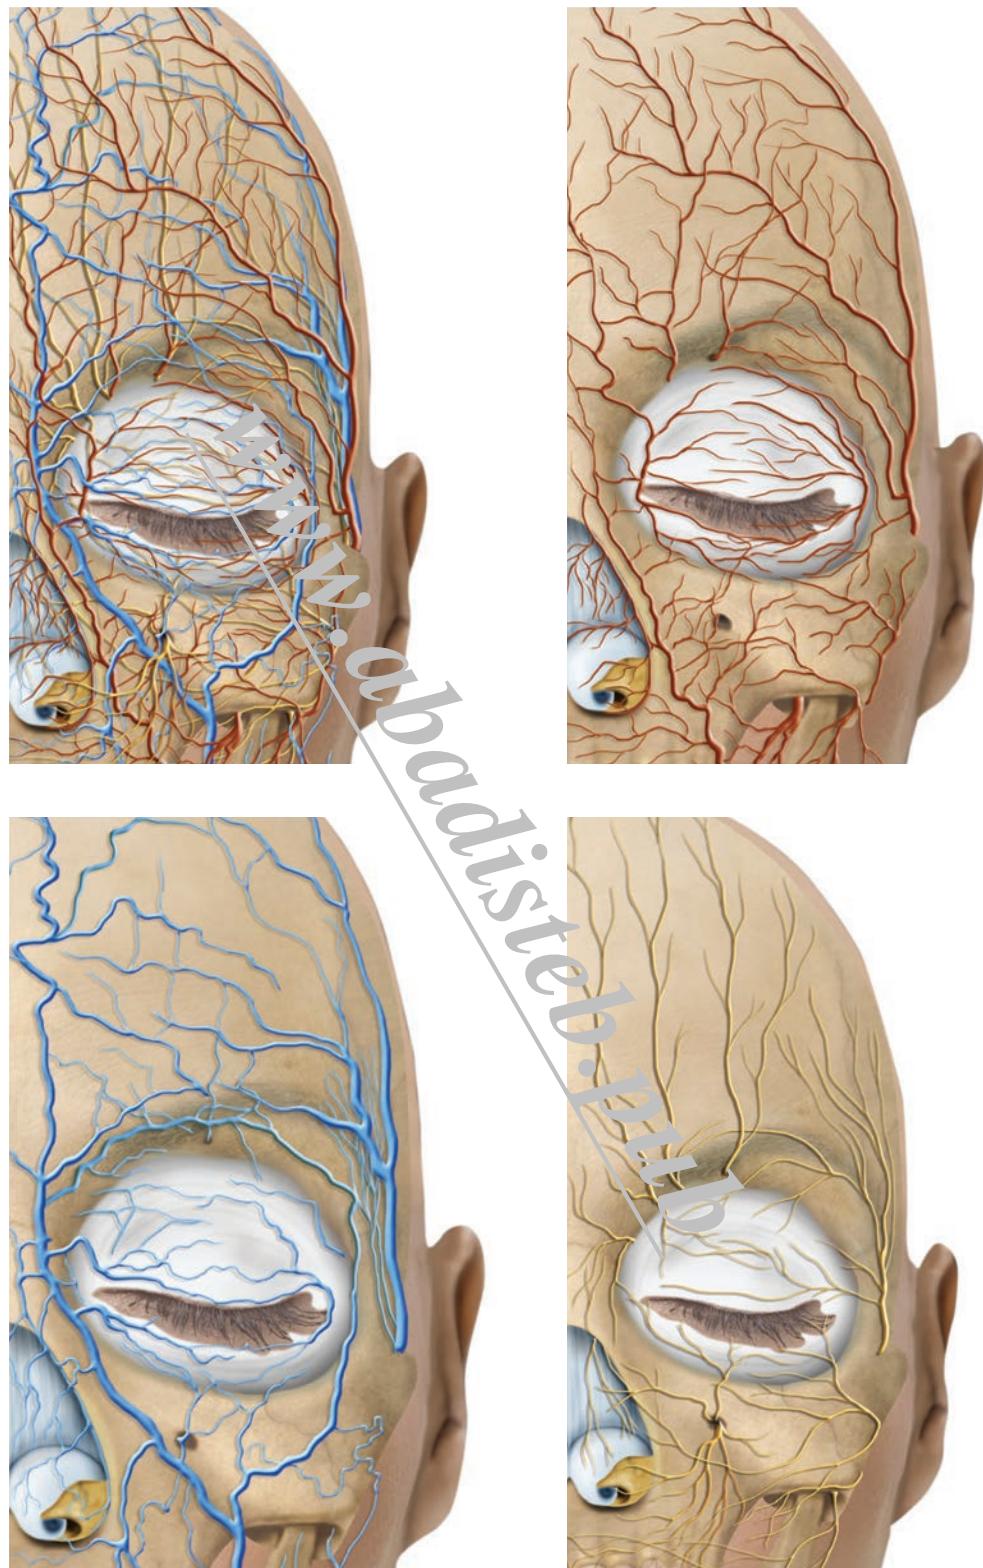

**Video 13:** Mentolabial sulcus—Cannula injection technique (Left side)

**Video 14:** Mentolabial sulcus—Needle injection technique

**Video 15:** Prejowl—Cannula injection technique

**Video 16:** Jawline and jaw angle—Cannula injection technique

**Video 17:** Jaw angle—Needle injection technique

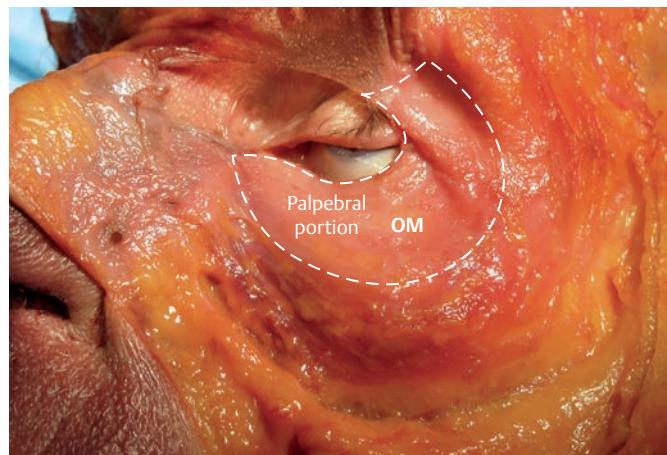

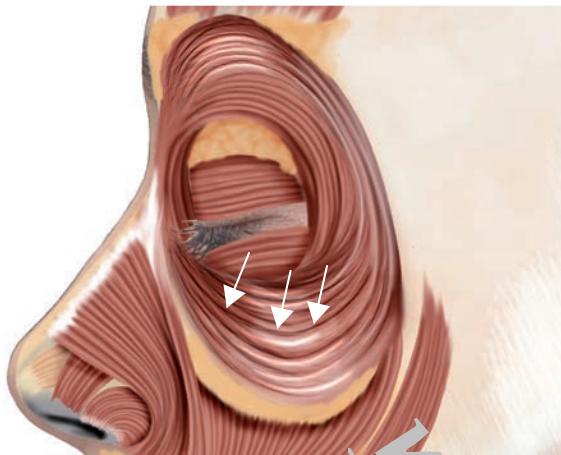

**Fig. 6.5** Frontal view of the vascularization and innervation of the temporal region.

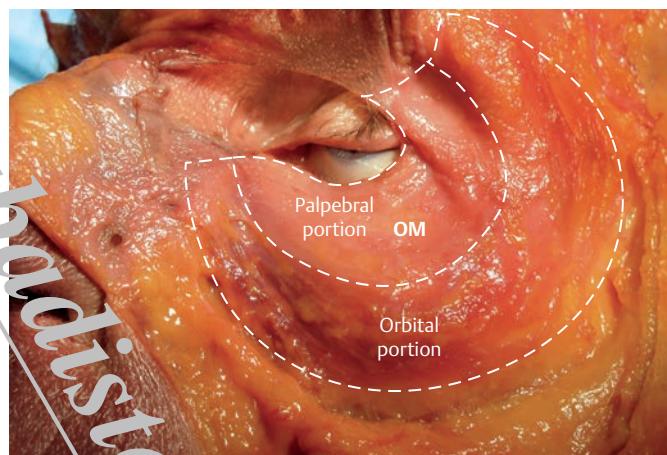

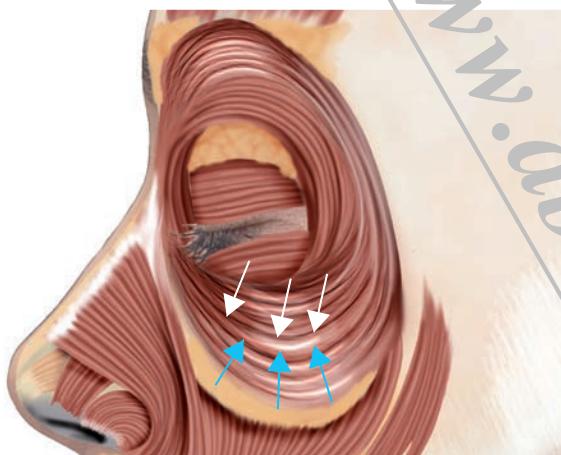

**Fig. 6.10** **A and B.** Left side of the face of a fresh cadaver specimen with the skin being folded back. **C and D.** Exposure of the subcutaneous tissue of the temporal region.

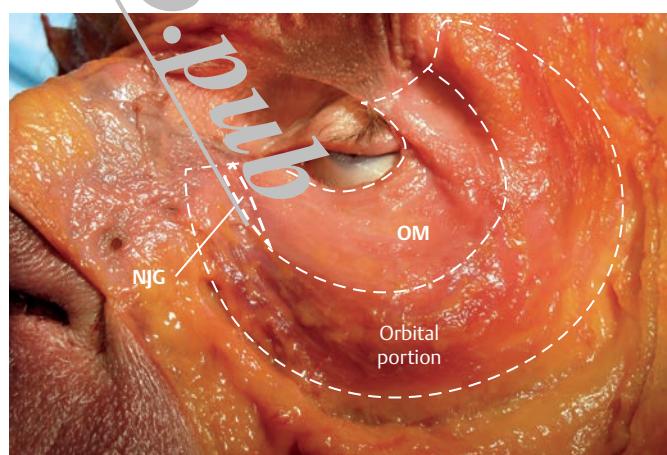

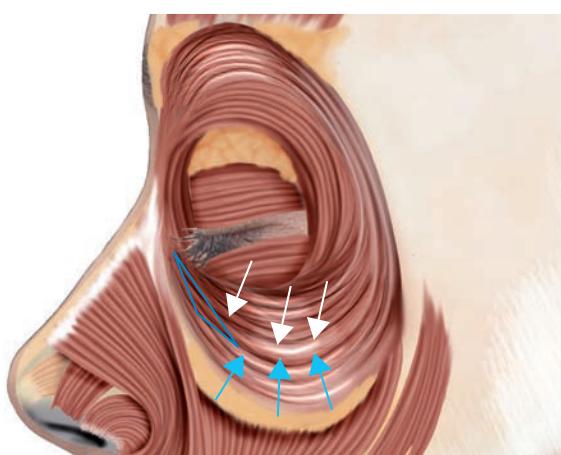

**Fig. 10.23** **A.** Anterior view of the left side of the face of a model showing the malar region to be filled (dark red markings). 25 G × 40 mm cannula inserted into the submuscular plane and product injected using a bolus technique (blue circle) in the superior region, and retrograde injection in the inferior portion. **B.** The model in the same position with tip of the cannula positioned laterally, in the transition between the anterior malar region and the zygomatic region. **C.** Left side of the face of a cadaver specimen exposing the skin, superficial fat pad (SFP), orbicularis oculi muscle (OM), medial and lateral suborbicularis oculi fat (SOOF) pads, and marginal arch (Mar). There are three blue circles between the OM and the Mar, indicating where the product was injected into the medial SOOF, in the prezygomatic space.

A

B

C

**Fig. 11.11 A.** Illustration and fresh cadaver specimen showing the palpebral portion of the orbicularis oculi muscle (OM) (white arrows) after removal of the skin and the superficial cheek fat pad (SCFP). **B.** Illustration and fresh cadaver specimen showing the palpebral portion of the OM (white arrows) and the orbital portion (blue arrows) after removal of the skin and the SCFP. **C.** Illustration and fresh cadaver specimen showing the palpebral portion of the OM (white arrows), the orbital portion (blue arrows), and, between the two structures, the nasojugal groove (NJG).

**Fig. 14.4** Anterior view of the nose and the perinasal region. **B.** Same region after the skin has been folded back. **C.** Anterior view of the right side of the face after the skin has been folded back and anterior view of the left side of the face after the skin and the superficial fat pads have been folded back. **D.** Anterior view of the right side of the face after the skin, superficial fat pads, and suborbicularis oculi fat (SOOF) have been folded back, and anterior view of the left side of the face after the skin, superficial fat pads, zygomatic major muscle, and orbital portion of the orbicularis oculi muscle have been folded back.
